DETAILED ACTION

1. Preliminary amendment dated 09/09/99 has been received and entered. Claims 1-23, 45-82 have been canceled. Claims 24-44 are currently pending.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the transducers within sample fluid must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 24-44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The words "sensing transducers" is vague and unclear. There are electrodes within the sample liquid; however there is no transducer such as an ultrasonic transducer within the sample fluid.

5. Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on

Art Unit: 2856

notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term "sample fluid" in claims 24-44 is used by the claim to mean "a liquid enclosed within a probe whereby the liquid is responsive to ultrasonic energy, while the accepted meaning is "to judge a quantity of a fluid by inspecting a portion of the same fluid. The term is indefinite because the specification does not clearly redefine the term.
